Application/Control Number: 10/700,053

Art Unit: 3634

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

In claim 1, line 1, "An emergency release device, for" has been changed to --An apparatus comprising an overhead building closure door, an emergency release device, and--; and

In claims 2-25, and 29-33, line 1, "The emergency release device" has been changed to –The apparatus--;

Authorization for this examiner's amendment was given in a telephone interview with Mr. Venturino on 7/24/2006.

Claims 1-25 and 29-33 are allowable.

The following is an examiner's statement of reasons for allowance: the recitation of an overhead building closure door in combination with a closure assembly and an emergency release device comprising a decoupling element which decouples an engagement element from a drive motor and the decoupling element having a safety element in the form of a wire seal, a breakable cover, or manual intervention by a specialized tool which required manual intervention to

Art Unit: 3634

neutralize the safety element prior to actuation of the decoupling element is seen as an unobvious improvement over the art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication should be directed to Jerry Redman at telephone number 571-272-6835.
